 STEAKHOUSE & SEAFOOD

*Under New Management*

*Our goal was to make a bistro style eatery that really captures the personality of Houston and what better place to create this but on a landmark property in Northwest Houston.*

This is a location which has a rich history as a premier steakhouse and where people have been gathering for food, drinks and fun for generations.

From the aged Prime Beef to our always fresh Seafood, the details are what we're all about - combining the best of classic American, European and Asian cuisine influences, and presenting them in a relaxed setting of casual elegance. It's a place of sophisticated understatement, where you'll find many things which you're sure to recognize and perhaps a few surprising interpretations of some old favorites. Whether your party is two, twenty or hundreds, you'll find gracious service and a warm, inviting ambiance where you can enjoy just an appetizer with a glass of wine or a full dining experience.

*Monday*
